Citrix

Securing Application Deployment over the Web

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=1Y0-962>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 1Y0-962 exam in first attempt, but also you can get a high score to acquire Citrix certification.

If you use pass4sureofficial 1Y0-962 Certification questions and answers, you will experience actual 1Y0-962 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our Citrix exam prep covers over 95% of the questions and answers that may be appeared in your 1Y0-962 exam. Every point from pass4sure 1Y0-962 PDF, 1Y0-962 review will help you take Citrix 1Y0-962 exam much easier and become Citrix certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial Citrix 1Y0-962 course:

- * Up-to-Date Citrix 1Y0-962 questions taken from the real exam.
- * 100% correct Citrix 1Y0-962 answers you simply can't find in other 1Y0-962 courses.
- * All of our tests are easy to download. Your file will be saved as a 1Y0-962 PDF.
- * Citrix 1Y0-962 brain dump free content featuring the real 1Y0-962 test questions.

Citrix 1Y0-962 certification exam is of core importance both in your Professional life and Citrix certification path. With Citrix certification you can get a good job easily in the market and get on your path for success. Professionals who passed Citrix 1Y0-962 exam training are an absolute favorite in the industry. You will pass Citrix 1Y0-962 certification test and career opportunities will be open for you.

Question: 1

As network administrator at Company.com you are installing NFuse Classic on your Web server. NFuse Classic will be configured to work with your MetaFrame XP for Windows server farm. Which two must be specified when defining the Citrix Server settings? (Choose two)

- A. TCP/IP port number used by IIS.
- B. MetaFrame administrators credentials.
- C. All servers running the Citrix XML Service.
- D. MetaFrame server running the Citrix XML Service.
- E. TCP/IP port number used for the Citrix XML Service.

Answer: D, E

Explanation:

Web Interface for MetaFrame XP Page 35, Section: "Required Information".

Question: 2

At Company.com NFuse Classic is deployed to provide internal and external users access to resources on 5 MetaFrame servers. The external users are located in remote offices on the 3.1.x.x subnet and have a trusted partnership with the network. Internal users as well as NFuse Classic and the MetaFrame servers are all located at the headquarters office on the 177.10.x.x subnet. The required result is to have all users connect to NFuse Classic using a public translated address EXCEPT internal users who connect directly using the private IP address. Which two configurations should be used to produce the required result? (Choose two)

- A. Set the default address translation setting to normal address.
- B. Set the default address translation setting to translated address.
- C. Select normal address and specify 3.1 in the Client Address Prefix field for the specific address translation settings.
- D. Select translated address and specify 3.1 in the Client Address Prefix field for the specific address translation settings.
- E. Select normal address and specify 177.10 in the Client Address Prefix for the specific address translation settings.
- F. Select translated address and specify 177.10 in the Client Address Prefix field for the specific address translation settings.

Answer: B, E

Explanation:

B: is the default for external clients as the question requires. E is the Exception, used for client private IP addresses 177.10. Web Interface for MetaFrame XP Page 80, Example 1, Solution 2. Answer would not be B, C. If B is the default there would be no need to specify a specific client map for users on the 3.1.x.x network to use the translated address. You would however have to specify that users of the 177.10.x.x network should use the normal rather than the translated address. I am wondering if in this question also you did not mean to have all users connect using the alternate and not the translated address. Setting up translated addressing is actually more complex than the scenario provides for.

Question: 3

An administrator has installed the Web Interface on a web server named "resources". During installation of the Web Interface, he specified the MetaFrame XP server named "HQApps" which resides in the "HQServe" farm. To which URL should the administrator browse in order to verify that installation was successful?

- A.http://resources/HQApps
- B.http://HQApps/resources/Citrix
- C.http://HQApps/Citrix/MetaFrame
- D.http://resources/Citrix/MetaFrameXP

Answer: D

Explanation:

Web Interface forMetaFrameXPPage 119, Section: "Making the Web Interface Available to Users"

Question: 4

Which three of the following are provided by the primary XML service to the Web Interface Java objects? (Choose three)

- A. TemplateICAfiles
- B. CustomizedICAfiles
- C. User's application set
- D. Authentication ticker for the user
- E. IP address of the least busy server on the farm

Answer: C, D, E

Explanation:

Reference: CTX-1227BI Page 23: "Step 7: The primary Citrix XML Service returns the IP address of the least-busy server and an authentication ticket to the web server"

Question: 5

Which component of MetaFrame is responsible for sending farm information to the server running Web Interface?

- A.ICAService
- B.IMA Service
- C.Citrix XML Service
- D.MetaFrame COM Service

Answer: C

Explanation:

Web Interface forMetaFrameXPPage 23, Step 3.

Question: 6

Which component of a Web Interface for MetaFrame XP deployment authenticates users?

- A. Web server
- B. MetaFrame XP server
- C. Secure Gateway server
- D. Secure Ticketing Authority

Answer: B

Question: 7

Which page in the Web Interface Admin tool allows you to configure proxy settings?

- A. ICA Client deployment

- B. Client-side firewall settings
- C. Server-side firewall settings
- D. Manage MetaFrame server farms

Answer: B

Explanation:

Web Interface for MetaFrameXPPage 86, Section "Configuring Client-Side Firewall Settings"

Question: 8

What can be used to configure Program Neighborhood Agent clients to use authentication methods that are different from other clients in a Web Interface implementation?

- A. NFUCSE.CONF
- B. Web Interface Admin tool
- C. Citrix Management Console
- D. Program Neighborhood Agent Admin tool
- E. Program Neighborhood Configuration agent

Answer: D

Explanation:

The tool used to administer Program neighborhood agent is Program neighborhood Agent admin tool which is a new feature in Future Release 3. In the earlier versions Config.xml file was used. Web Interface for MetaFrameXPPage 86, Section "Configuring Client-Side Firewall Settings" Look under the bullet points.

Question: 9

Which three ICAJava Client settings can be included when users download the client in a Web Interface deployment? (Choose three)

- A. Audio
- B. Encryption
- C. Connection center
- D. Legacy server support

Answer: A, B, D

Explanation:

Web Interface for MetaFrameXPPage 94, Section "To Configure ICAJava Client Deployment"

Question: 10

What can prevent an administrator from logging into the Web Interface Admin tool? (Choose two)

- A. Attempting to access the site using HTTPS.
- B. Attempting to access the Admin tool through a firewall.
- C. Attempting to access the Admin tool on a server running IIS.
- D. Attempting to access the Admin tool through an HTTP proxy server.

Answer: B, D

Explanation:
