

# 1Z0-236

## Oracle

### *Oracle 11i Applications DBA Fundamentals II*

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=1Z0-236>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 1Z0-236 exam in first attempt, but also you can get a high score to acquire Oracle certification.

If you use pass4sureofficial 1Z0-236 Certification questions and answers, you will experience actual 1Z0-236 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our Oracle exam prep covers over 95% of the questions and answers that may be appeared in your 1Z0-236 exam. Every point from pass4sure 1Z0-236 PDF, 1Z0-236 review will help you take Oracle 1Z0-236 exam much easier and become Oracle certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial Oracle 1Z0-236 course:

- \* Up-to-Date Oracle 1Z0-236 questions taken from the real exam.
- \* 100% correct Oracle 1Z0-236 answers you simply can't find in other 1Z0-236 courses.
- \* All of our tests are easy to download. Your file will be saved as a 1Z0-236 PDF.
- \* Oracle 1Z0-236 brain dump free content featuring the real 1Z0-236 test questions.

Oracle 1Z0-236 certification exam is of core importance both in your Professional life and Oracle certification path. With Oracle certification you can get a good job easily in the market and get on your path for success. Professionals who passed Oracle 1Z0-236 exam training are an absolute favorite in the industry. You will pass Oracle 1Z0-236 certification test and career opportunities will be open for you.

**QUESTION: 1**

You plan to perform a backup of the control file in your database. Which two statements regarding the control file backup are true? (Choose two.)

- A. You can back up the control file to a binary file.
- B. You must bring the database to the NOMOUNT state to perform the control file backup.
- C. You must store all types of control file backups in the location defined by USER\_DUMP\_DEST.
- D. You can back up the control file by generating a script that can be used to re-create the control file.

**Answer:** A, D

**QUESTION: 2**

Which type of lock is held by SQL statements and PL/SQL objects in the Library Cache?

- A. breakable parse locks
- B. row-level (TX type) lock
- C. table-level manual locks
- D. table-level (TM type) locks

**Answer:** A

**QUESTION: 3**

In an online transaction processing (OLTP) system, which is configured in shared server mode, you execute the following query to examine the sort performance:

```
SQL> SELECT d.value "Disk", m.value "Mem", (d.value/m.value)*100 "Ratio"
       FROM v$sysstat m, v$sysstat d
       WHERE m.name='sorts (memory)' and d.name='sorts (disk)';
```

Disk	Mem	Ratio
-----	-----	-----
23	206	11.165049

What action would you take after observing the output?

- A. increase the value of SORT\_AREA\_SIZE
- B. increase the size of the temporary tablespace
- C. increase the value of PGA\_AGGREGATE\_TARGET
- D. no action required because the ratio is perfect for an OLTP system

**Answer:** A

**QUESTION: 4**

Users complain of slow response time in your online transaction processing (OLTP) system. You compare current statistics with baseline statistics. You notice that in the current statistics

library cache, the hit ratio has decreased and there are request misses for shared pool reserved area. Given below are the sizes of shared pool and shared pool reserved area:

SHARED\_POOL\_SIZE = 500 MB SHARED\_POOL\_RESERVED\_SIZE = 50 MB

What kind of strategy would you suggest for performance tuning?

- A. increase the size of only the shared pool
- B. decrease the size of the shared pool reserved area
- C. increase the size of only the shared pool reserved area
- D. increase the sizes of both the shared pool and the shared pool reserved area
- E. increase the size of the shared pool and decrease the size of the shared pool reserved area

**Answer:** D

**QUESTION: 5**

You are working in an OLTP environment. You wish to reduce the virtual memory requirements for the Oracle instance due to Operating system paging or swap overheads. You need to determine whether the buffer cache is oversized and could tolerate being reduced. In which two cases can you afford to reduce the buffer cache size? (Choose two.)

- A. if the cache hit ratio is very high
- B. if there are no waits for free buffers
- C. if the rate of physical I/O is very high
- D. if the number of full table scans is very low
- E. if the number of index accesses is very high

**Answer:** A, B

**QUESTION: 6**

When starting up the test database, you encounter the following error after mounting the database:

ORA-00313: open failed for members of log group 2 of thread 1

ORA-00312: online log 2 thread 1: '/u01/oracle/app/oradata/log2.log' ORA-27037: unable to obtain file status

While investigating the reason, you find that the status of the redo log group 2 is CURRENT. Which type of recovery would you perform to ensure that the database is functional?

- A. Open Database recovery
- B. Time-Based incomplete recovery
- C. recovery using the backup control file
- D. Cancel-Based incomplete recovery
- E. Change-Based incomplete recovery

**Answer:** D

**QUESTION: 7**

What provides the information about the free extents in a temporary tablespace before a sort operation?

- A. LRU chain
- B. sort extent pool
- C. resource free list
- D. free extent table (FET\$)
- E. used extent table (UET\$)

**Answer: B**

**QUESTION: 8**

What action can you take to reduce the recovery time in case of instance failures?

- A. use an SPFILE
- B. multiplex the control files
- C. reduce the number of data files used by the database
- D. reduce the number of redo log members in each group
- E. configure database parameters to increase the frequency of checkpoints

**Answer: E**

**QUESTION: 9**

The HR team is complaining about the poor response time of SQL statements on certain tables. On investigation, you find that the generation of recursive calls (in addition to SQL statements) to perform space management operations is the cause for the poor response time. To solve the problem, you executed the following command as the first step:

```
SQL> SELECT owner, table_name, blocks, empty_blocks
  2 FROM dba_tables
  3 WHERE empty_blocks/(blocks+empty_blocks)<.1;
```

OWNER	TABLE_NAME	BLOCKS	EMPTY_BLOCKS
HR	REGIONS	1205	30
HR	LOCATIONS	110	5

Select the next step that you would perform.

- A. allocating extent to the tables by using the ALTER TABLE command
- B. changing the block size by using the ALTER TABLESPACE command
- C. exporting, dropping, and importing the REGIONS and LOCATIONS tables
- D. creating the necessary indexes on the REGIONS and LOCATIONS tables

## Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
- **Lifetime** login access.
- Unlimited download, no account expiry, no hidden charges, just one time \$99 payment.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with explanations (If applicable).
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
