Exam Name:	Oracle Enterprise Linus: Linux Fundamentals		
Exam Type:	Oracle		
Exam Code:	1Z0-402	Total Question	223

Question: 1

As user smith you want the CPU utilization of all the users logged on to server1 server. You want the information available automatically as soon as you login to the bash login shell and want the information available only to smith. What would you do on server1, which has all the default shell configuration files, to accomplish the task?

- A. Add the w command to ~/.profile file.
- B. Add the who command to ~/.profile file.
- C. Add the w command to ~/.bash_profile file.
- D. Add the who command to ~/.bash_profile file.

Answer: C

Question: 2

View the Exhibit.

```

echo " Enter your option (who,date,ls)"
read input
case "$input" in
  who ) echo "finding the currently logged in users..., The following is the
        list"
        who
        ;;
  date ) echo " Printing todays date and current times:
        date
        ;;
  ls ) echo " Running the is command... :
        ls
        ;;
      echo " You have entered an invalid choice, Plz enter either who, date
or ls "
      ;;
esac
exit 0

```

The shell script is executed using the default shell interpreter with the input as w. What will be the output of the script based on this input?
