

3M0-212

3COM

Certified Enterprise LAN Specialist Final Exam v3.0

OfficialCerts.com is a reputable IT certification examination guide, study guides and audio exam provider. We ensure that you pass your 3M0-212 exam in first attempt and also get high scores to acquire 3COM certification.

If you use OfficialCerts 3M0-212 Certification questions and answers, you will experience actual 3M0-212 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our 3COM exam prep covers over 95% of the questions and answers that may be appeared in your 3M0-212 exam. Every point from pass4sure 3M0-212 PDF, 3M0-212 review will help you take 3COM 3M0-212 exam much easier and become 3COM certified.

Here's what you can expect from the OfficialCerts 3COM 3M0-212 course:

- * Up-to-Date 3COM 3M0-212 questions as experienced in the real exam.*
- * 100% correct 3COM 3M0-212 answers you simply can't find in other 3M0-212 courses.*
- * All of our tests are easy to download. Your file will be saved as a 3M0-212 PDF.*
- * 3COM 3M0-212 brain dump free content featuring the real 3M0-212 test questions.*

3COM 3M0-212 certification exam is of core importance both in your Professional life and 3COM certification path. With 3COM certification you can get a good job easily in the market and get on your path for success. Professionals who passed 3COM 3M0-212 exam training are an absolute favorite in the industry. You will pass 3COM 3M0-212 certification test and career opportunities will be open for you.

QUESTION: 1

Which two are switching fabric features/functions on the Switch 8800? (Choose two.)

- A. The switch fabric is hot-swappable, load-balancing fabric
- B. The master switch fabric must be in slot #1
- C. Redundant switch fabric remains in standby mode unless the master switch fabric fails
- D. The master switch fabric provides route calculation and management for the entire chassis

Answer: A, D

QUESTION: 2

For which customer network environment does 3Com recommend the Switch 8800 family?

- A. Internet Service Provider (ISP)
- B. Large enterprise network core
- C. All of the above
- D. Large enterprise distribution layer

Answer: B

QUESTION: 3

Which two queuing features are supported on the Switch 8800? (Choose two.)

- A. The switch only supports Strict Priority (SP) queuing
- B. Eight output queues per port
- C. The switch supports multiple queuing algorithms (i.e., Strict Priority (SP) queuing, Weighted Random Early Discard)
- D. QoS policies are based on Layer 2 packet information only

Answer: B, C

QUESTION: 4

Which two are Quality of Service (QoS) features of the Switch 5500 family? (Choose two.)

- A. Eight hardware queues per switch
- B. Eight hardware queues per port

- C. Configurable queue processing
- D. Queue priority is based only on FirstIn First Out (FIFO) algorithm

Answer: B, C

QUESTION: 5

Which two describe the attributes of the Switch 8800 switch fabrics? (Choose two.)

- A. Upon failover, the slave switch fabric must learn and rebuild all routing tables
- B. Switch must be powered off to replace a switch fabric
- C. The slave switch fabric provides active, load-balancing data switching
- D. Switch fabric load balancing is enabled by the user

Answer: C, D

QUESTION: 6

DRAG DROP

Click the Task button.

Drag each switch family to the recommended customer environment.

Drag each switch family to the recommended customer environment.

place here	 Switch 5500 G-EI
place here	 Switch 7700/7750
place here	 Switch 8800

Large enterprise network core	Small to medium enterprise network core	Small to medium enterprise network core/distribution center
-------------------------------	---	---

Answer:

Drag each switch family to the recommended customer environment.

Small to medium enterprise network core/distribution center	
Small to medium enterprise network core	
Large enterprise network core	

Large enterprise network core Small to medium enterprise network core Small to medium enterprise network core/distribution center

QUESTION: 7

Which three application-availability techniques should be used to ensure high network availability? (Choose three.)

- A. Protect resources with network security
- B. Enforce techniques primarily at the network core
- C. Block rogue applications
- D. Identify and prioritize mission-critical applications

Answer: A, C, D

QUESTION: 8

Which component of XRN technology is defined as: "An advanced routing implementation that allows multiple interconnected switches in an XRN solution to behave as a single active routing entity"?

- A. XRN Interconnect
- B. Distributed Link Aggregation (DLA)
- C. Distributed Device Management (DDM)
- D. Distributed Resilient Routing (DRR)

Answer: D

QUESTION: 9

Which two are benefits of the Switch 5500 XRN Distributed Device Management (DDM) support? (Choose two.)

- A. Supports up to 12 switches in a single stack
- B. All switches within a stack act as a single logical device
- C. Resilient XRN architecture provides management access if any switch fails in a stack
- D. Creates a 12Gbps full-duplex link between switches

Answer: B, C

QUESTION: 10

Which Switch 5500 model(s) supports a 96 Gbps full-duplex XRN stacking connection?

- A. Switch 5500G-EI
- B. All of the above
- C. Switch 5500-EI
- D. Switch 5500-SI

Answer: A

QUESTION: 11

Which two are Switch 8800 routing configuration considerations? (Choose two.)

- A. Supports OSPF
- B. By default, RIP is disabled on the switch
- C. Supports EIGRP
- D. By default, RIP v2 runs when RIP is enabled

Answer: A, B

QUESTION: 12
