Microsoft

PRO- Designing and Deploying Messaging Solutions with Microsoft Exchange Server 2010

OfficialCerts.com is a reputable IT certification examination guide, study guides and audio exam provider. We ensure that you pass your 70-663 exam in first attempt and also get high scores to acquire Microsoft certification.

If you use OfficialCerts 70-663 Certification questions and answers, you will experience actual 70-663 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our Microsoft exam prep covers over 95% of the questions and answers that may be appeared in your 70-663 exam. Every point from pass4sure 70-663 PDF, 70-663 review will help you take Microsoft 70-663 exam much easier and become Microsoft certified.

Here's what you can expect from the OfficialCerts Microsoft 70-663 course:

- * Up-to-Date Microsoft 70-663 questions as experienced in the real exam.*
- * 100% correct Microsoft 70-663 answers you simply can't find in other 70-663 courses.*
- * All of our tests are easy to download. Your file will be saved as a 70-663 PDF.*
- * Microsoft 70-663 brain dump free content featuring the real 70-663 test questions.*

Microsoft 70-663 certification exam is of core importance both in your Professional life and Microsoft certification path. With Microsoft certification you can get a good job easily in the market and get on your path for success. Professionals who passed Microsoft 70-663 exam training are an absolute favorite in the industry. You will pass Microsoft 70-663 certification test and career opportunities will be open for you.

QUESTION: 1

You work as the enterprise exchange administrator at ABC.com. ABC.com is utilizing a firewall to keep the perimeter network and the corporate network apart. ABC.com contains an Edge Transport server named ABC-EX01 in the perimeter network that is running Exchange Server 2010. You are preparing to implement an Exchange Server 2010 environment that provides for EdgeSync synchronization and encryption of outgoing e-mail. What must you do to implement Exchange Server 2010 without compromising network security?

- A. You should use port 80 and 443 from the corporate network to the perimeter network.
- B. You should use port 50636 and 25 from the corporate network to the perimeter network.
- C. You should use port 1024 to 65535 from the corporate network to the perimeter network.
- D. You should use port 443 and 1024 from the corporate network to the perimeter network.

Answer: B

QUESTION: 2

You are employed as the enterprise exchange administrator at ABC.com. The ABC.com network has a domain named ABC.com. You are preparing to set up an Exchange Server 2010 environment to fulfill the following criteria:

- The database availability group (DAG) should be available for the Mailbox servers.
- E-mail should be available in the event of a server going offline.
- Load balancing should be used on the MAPI connections utilizing a hardware load balancer. What steps must you take to comply with the criteria while using the minimum amount of servers?

- A. You should use the Exchange Server 2010 Exchange Management Console (EMC) and install the Client Access server, Mailbox server on one server and install the Hub Transport server role on the second server.
- B. You should use the Exchange Control Panel (ECP) and install the Client Access server, Mailbox server and the Hub Transport server role on a server.
- C. You should install the Client Access server, Mailbox server and the Hub Transport server role on two separate servers that are Outlook Anywhere enabled.
- D. You should use the Exchange Control Panel (ECP) and install the Client Access server, Mailbox server and the Hub Transport server role on two servers.

Answer: C

QUESTION: 3

You work as the exchange administrator at ABC.com. The ABC.com network runs in an Exchange Server 2010 environment with a few Hub transport servers. You are preparing to implement a messaging strategy that will stop servers from sending spam, using the least amount administration?

- A. You should implement a managed folder mailbox policy.
- B. You should change the properties of the Mailbox server object.
- C. You should change the default Exchange ActiveSync mailbox policy.
- D. You should implement IP Block list providers.
- E. You should make use of a restrictions-based e-mail policy.

Answer: D

QUESTION: 4

You work as the exchange administrator at ABC.com. ABC.com network runs in an Exchange Server 2010 environment. ABC.com contains a few servers that host the Edge transport server and the Hub transport server role separately. The ABC.com users use the Edge transport servers to send e-mail to their customers. ABC.com contains a new policy that is as follows:

- The users should use encrypted e-mail to their customers.
- Encryption should be used between the Hub Transport and Edge Transport servers.

What actions must you take to adhere to the New ABC.com security policy?

- A. You need to use Security/Multipurpose Internet Mail Extensions (S/MIME).
- B. You need to use SMTP over TLS.
- C. You need to use IMAP4 over SSL.
- D. You need to use Lightweight LDAP over SSL.

Answer: A

QUESTION: 5

You work as the exchange administrator at ABC.com. ABC.com network runs in an Exchange Server 2010 environment. ABC.com contains two data centers, each residing in a perimeter network. You are preparing to install Exchange Server 2010 Edge Transport servers in every perimeter network that has the following criteria:

- It should allocate incoming e-mail to all Edge Transport servers.
- In the case of an Edge Transport server or a single data center network malfunction or unavailability, e-mails should still be reached by the employees' incoming e-mail. What actions must you take to satisfy these criteria while keeping costs as low as possible? (Choose two)

- A. You should install a Hub Transport server in every perimeter network.
- B. You should set up failover clustering.
- C. You should install an Edge Transport server in every perimeter network.
- D. You should install an Exchange Server 2010 Client Access server.
- E. You should create a transport rule.
- F. You should set up a mail exchange (MX) record for all the servers.
- G. You should install a Hub Transport server.
- H. You should set up a server cluster group.

Answer: C, F

QUESTION: 6

ABC.com has employed you as their Exchange Administrator. The ABC.com network runs in an Exchange Server 2010 environment. ABC.com contains a few servers that host the Hub transport server role. One of the Hub Transport servers named ABC-EX01 is utilized by an in-house application. The retry of e-mail is done by the in-house application that is configured to send e-mail to a SMTP server. The CIO wants you to make sure that ABC-EX01's tabs are utilized by the in-house application to try the e-mail again. What actions must you take?

- A. You should on the Hub Transport servers, enable Datacenter Activation Coordination (DAC) mode.
- B. You should on the Hub Transport servers, use network load balancing.
- C. You should on the Hub Transport servers, deploy a hardware load balancer.
- D. You should on the Hub Transport servers, add Active Directory Federation Services (AD FS).

Answer: B

QUESTION: 7

You work as the enterprise exchange administrator at ABC.com. ABC.com has its headquarters in Chicago and a branch office in Dallas, which is configured as a site that is connected to each other via a high speed WAN connection. You are planning to install Exchange Server 2010 in the environment. However, you need to install

exchange server that will be available even in an event of a server going offline and What do you need to comply with the criteria using the least servers?

- A. You need to install six exchange servers.
- B. You need to install eight exchange servers.
- C. You need to install four exchange servers in each office.
- D. You need to install two exchange servers in each office.

Answer: D

QUESTION: 8

ABC.com has employed you as their Exchange Administrator. The ABC.com network runs in an Exchange Server 2010 environment. ABC.com contains a server named ABC-EX01 that has the Hub transport server role installed and hosts anti-spam agents. The management of ABC.com resides in a group named KingSecurity. The ABC.com CIO wants KingSecurity to handle anti-spam configurations in the environment. What actions must you take while still applying the principle of least privilege?

- A. You need to grant KingSecurity the Custom Management role.
- B. You need to grant KingSecurity the Records Management role.
- C. You need to grant KingSecurity the Recipient Management role.
- D. You need to grant KingSecurity the View-Only Organization Management role.

Answer: B

QUESTION: 9

You work as the enterprise exchange administrator at ABC.com. The ABC.com network consists of a domain named ABC.com. ABC.com is configured to run in an Exchange Server 2003 environment. ABC.com contains an Exchange Server 2003 server that receives e-mail from outside the ABC.com domain. However, ABC.com wants to use an Exchange Server 2010 Hub Transport server for the receiving of e-mail from outside the domain. What actions must you take?

- A. You should change the Active Directory Connector (ADC).
- B. You should change the Public Folder Management Console.
- C. You should change the accepted domains.
- D. You should change the Exchange Management Console (EMC).
