Nortel

Nortel Converged Office CS 1000 Rls.5.x Configuration & Networking

OfficialCerts.com is a reputable IT certification examination guide, study guides and audio exam provider. We ensure that you pass your 920-471 exam in first attempt and also get high scores to acquire Nortel certification.

If you use OfficialCerts 920-471 Certification questions and answers, you will experience actual 920-471 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our Nortel exam prep covers over 95% of the questions and answers that may be appeared in your 920-471 exam. Every point from pass4sure 920-471 PDF, 920-471 review will help you take Nortel 920-471 exam much easier and become Nortel certified.

Here's what you can expect from the OfficialCerts Nortel 920-471 course:

- * Up-to-Date Nortel 920-471 questions as experienced in the real exam.*
- * 100% correct Nortel 920-471 answers you simply can't find in other 920-471 courses.*
- * All of our tests are easy to download. Your file will be saved as a 920-471 PDF.*
- * Nortel 920-471 brain dump free content featuring the real 920-471 test questions.*

Nortel 920-471 certification exam is of core importance both in your Professional life and Nortel certification path. With Nortel certification you can get a good job easily in the market and get on your path for success. Professionals who passed Nortel 920-471 exam training are an absolute favorite in the industry. You will pass Nortel 920-471 certification test and career opportunities will be open for you.

Question: 1

A customer has an IP Peer Network and has made changes to the dialing plan in the Network Routing Service. Which Database Action option lets you activate changes and run tests without making the changes permanent?

- A. Cutover
- B. Commit
- C. Rollback
- D. Reset and Test

Answer: A

Question: 2

The customer recently implemented IP Peer Networking in a Communication Server 1000 RIs. 5.0 network. The customer now wants to deploy the Geographic Redundancy feature. Which Network Routing Service element must be configured to support Geographic Redundancy?

- A. Branch Office
- B. Collaborative Server
- C. Emergency Services
- D. Network Connection Service

Answer: D

Question: 3

A customer has IP Peer network using only the SIP protocol. Signaling Server 1 hosts the Primary NRS. The customer wants to add an Alternate NRS using Signaling Server 2, which resides at a remote site. Considering the company requirements, which step is required?

- A. Change NRS role of Signaling Server 2 to Active.
- B. Change NRS role of Signaling Server 2 to Alternate.
- C. Change the SIP URI Mapping to Alternate for all nodes.
- D. Change the ENL/DIS switch on Signaling Server 1 to Alternate.

Answer: B

Question: 4

You are configuring the Network Routing Service for an H.323 network. Which step is mandatory for all IP Peer Networking scenarios?

- A. Add a Service Domain
- B. Add a Collaborative Server
- C. Implement Geographic Redundancy
- D. Configure the Network Connection Server

Answer: A

Question: 5

Which Network Routing Service option lets you view the last database synchronization for the Alternate NRS?

- A. Tools
- B. Reports
- C. Configuration
- D. Administration

Answer: B

Question: 6

You have received a work order to add a new endpoint to the Network Routing Service database. Which database schema or view would you use for administrator modifications?

- A. Active
- B. Standby
- C. Passthru
- D. Collaborative

Answer: B

Question: 7

You are defining generic settings for the NRS Server. Which is the correct entry or definition for the NRS Server Host name?

- A. Node ID address of the SIP Proxy
- B. ELAN IP address of the Call Server
- C. TLAN IP address of the Primary NRS
- D. Alias of connected host Signaling Server

Answer: D

Question: 8

During a planned work activity, the customer powered off the Primary Signaling Server on a Communication Server 1000 RIs. 5.0 system. Following the work activity, some IP telephones were unreachable, and they appeared to have old Directory Numbers assigned to them. Which database configuration parameter would you check on the Alternate Signaling Server within the Network Routing Service?

- A. Re-boot the Alternate Signaling Server and invoke the BIOS command.
- B. Verify that the Alternate Signaling Server is defined for Fail-safe situations.
- C. Verify that the Signaling Server is defined as the Alternate Signaling Server.
- D. Verify that the Alternate Gatekeeper is configured for automatic database synchronization.

Answer: D

Question: 9

You are using Element Manager to verify the system configuration before implementing IP Peer Networking. Which element can you configure or modify using Element Manager, assuming a VxWorks platform?

- A. Call Server
- B. Hardware watchdog
- C. Network Connection Service
- D. Basic Input Output System (BIOS)

Answer: A

Question: 10

Which Communication Server 1000 web-based administration application does the Signaling host?

OfficialCerts.com Certification Exam Full Version Features;

- Verified answers researched by industry experts.
- Exams **updated** on regular basis.
- Questions, Answers are downloadable in **PDF** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
