

# 642-874

## Cisco

### *Designing Cisco Network Service Architectures*

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=642-874>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 642-874 exam in first attempt, but also you can get a high score to acquire Cisco certification.

If you use pass4sureofficial 642-874 Certification questions and answers, you will experience actual 642-874 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our Cisco exam prep covers over 95% of the questions and answers that may be appeared in your 642-874 exam. Every point from pass4sure 642-874 PDF, 642-874 review will help you take Cisco 642-874 exam much easier and become Cisco certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial Cisco 642-874 course:

- \* Up-to-Date Cisco 642-874 questions taken from the real exam.
- \* 100% correct Cisco 642-874 answers you simply can't find in other 642-874 courses.
- \* All of our tests are easy to download. Your file will be saved as a 642-874 PDF.
- \* Cisco 642-874 brain dump free content featuring the real 642-874 test questions.

Cisco 642-874 certification exam is of core importance both in your Professional life and Cisco certification path. With Cisco certification you can get a good job easily in the market and get on your path for success. Professionals who passed Cisco 642-874 exam training are an absolute favorite in the industry. You will pass Cisco 642-874 certification test and career opportunities will be open for you.

**QUESTION: 1**

Which of these Layer 2 access designs does not support VLAN extensions?

- A. FlexLinks
- B. loop-free U
- C. looped square
- D. looped triangle

**Answer: B**

**QUESTION: 2**

As a critical part of the design for the Enterprise Campus network, which of the following two are true concerning intrusion detection and prevention solution? (Choose two)

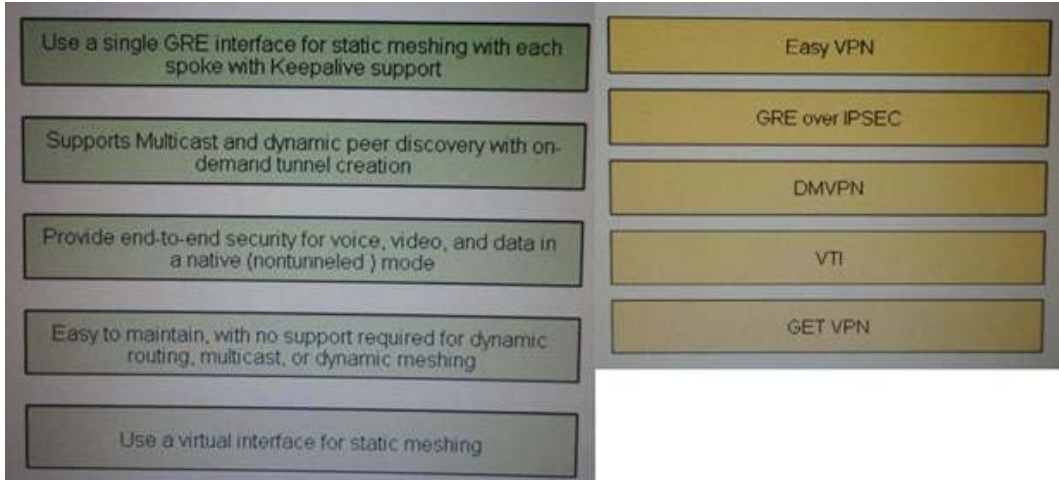

- A. IDS is capable of both inline and promiscuous monitoring, while IPS is only capable of promiscuous monitoring
- B. IDS will stop malicious traffic from reaching its intended target for certain types of attacks.
- C. IPS processes information on Layer 3 and 4 as well as analyzing the contents and payload of the packets for more sophisticated embedded attacks (Layers 3 to 7)
- D. IPS inspects traffic statefully and needs to see both sides of the connection to function properly
- E. IDS placement at the perimeter of Data Center outside the firewall generates many warnings that have relatively low value because no action is likely to be taken on this information

**Answer: C, E**

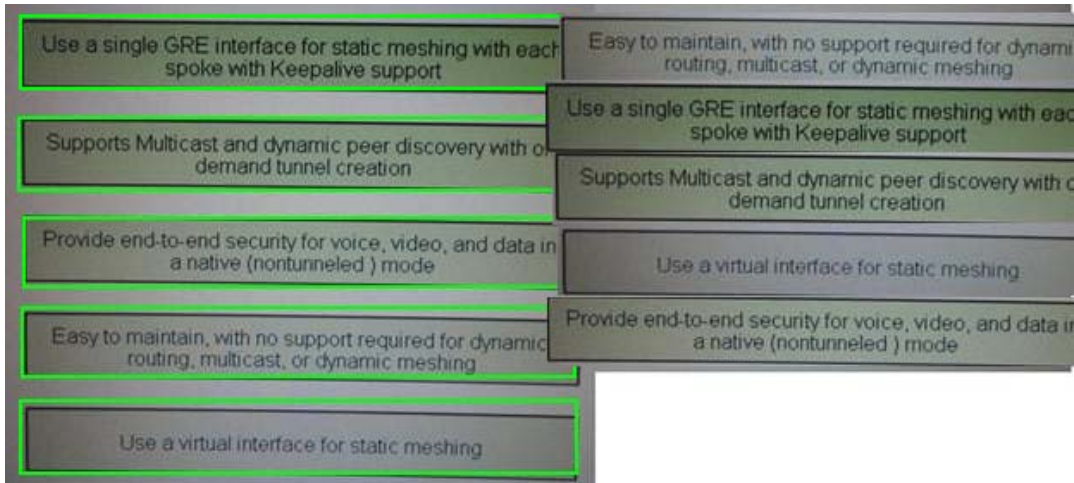

**QUESTION: 3**

DRAG DROP

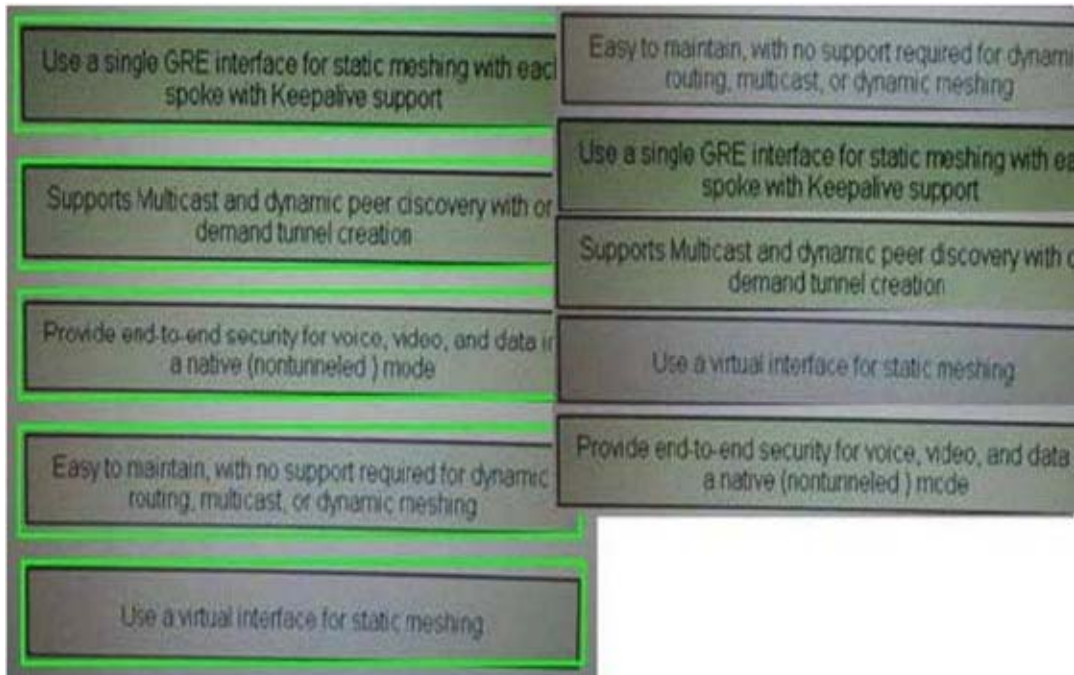

Drag the characteristic on the left to the corresponding IPSec VPN solution on the right.

**Answer:**

**Explanation:**

**QUESTION: 4**

OSPF stub areas are an important tool for the Network designer; which of the following two should be considered when utilizing OSPF stub areas?

- A. OSPF stub areas increase the size of the LSDB with the addition of Type 3 and 5 LSAs
- B. OSPF not so stubby areas are particularly useful as a simpler form of summarization
- C. OSPF stub areas are always insulated from external changes
- D. OSPF stub areas can distinguish among ASBRs for destinations that are external to the OSPF domain
- E. OSPF totally stubby cannot distinguish among ABRs for the best route to destinations outside the areas

**Answer:** B, E

**QUESTION: 5**

Which two statements are correct regarding Flex Links? (Choose two)

- A. An interface can belong to multiple Flex Links.
- B. Flex Links operate only over single pairs of links.
- C. Flex Link pairs must be of the same interface type
- D. Flex Links automatically disable STP so no BPDUs are propagated
- E. Failover from active to standby on Flex Links takes less than a second

**Answer:** B, D

**QUESTION: 6**

Which of these technologies is characterized as being a multipoint Layer 2 VPN that connects two or more customer devices using Ethernet bridging techniques?

- A. DPT
- B. MPLS
- C. VPLS
- D. CWDM
- E. DWDM
- F. SONET/SDH

**Answer:** C

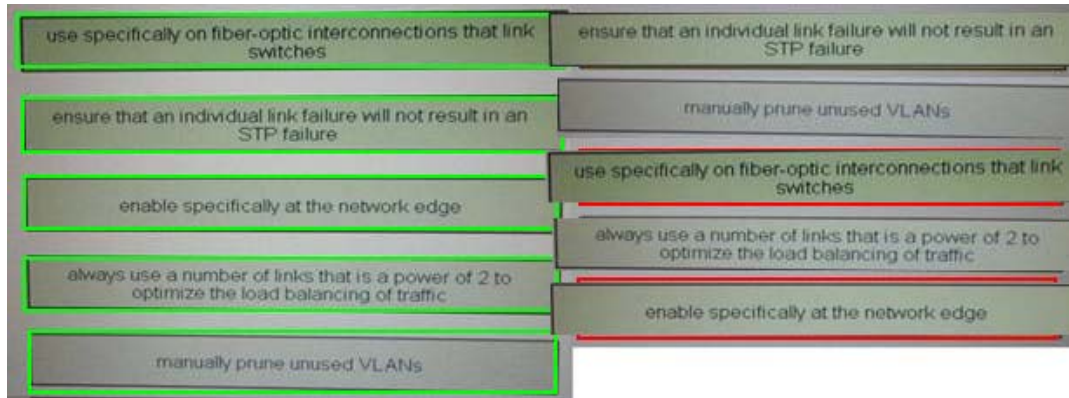

**QUESTION: 7**

**DRAG DROP**

Drag the best practice recommendation for an Enterprise Campus network on the left to the technology to which it most applies on the right.

use specifically on fiber-optic interconnections that link switches	STP
ensure that an individual link failure will not result in an STP failure	Trunks
enable specifically at the network edge	UDLD
always use a number of links that is a power of 2 to optimize the load balancing of traffic	Etherchannel
manually prune unused VLANs	VSS

**Answer:**

**Explanation:**

Use specifically on fiber-optic interconnections that link switches UDLD ensure that an individual link failure will not result in an STP failure STP enable specifically at the network edge VSS always use a number of links that is a power of 2 to optimize the load balancing of traffic Etherchannel Manually prune unused VLANs Trunks

**QUESTION: 8**

Why is STP required when VLANs span access layer switches?

- A. to ensure a loop-free topology
- B. to protect against user-side loops
- C. in order to support business applications
- D. because of the risk of lost connectivity without STP
- E. for the most deterministic and highly available network topology

**Answer: B**

**QUESTION: 9**

When designing the IP routing for the Enterprise Campus network, which of these following two iBGP considerations should be taken into account?

- A. iBGP dual horning with different ISPs puts the Enterprise at the risk of becoming a transit network
- B. iBGP requires a full mesh of eBGP peers
- C. Routers will not advertise iBGP learned routes to other iBGP peers.
- D. The use of route reflections or Confederation eliminate any full mesh requirement while helping to scale iBGP
- E. iBGP peers do not add any information to the AS path

**Answer: A, D**

**QUESTION: 10**

Which virtualization technology allows multiple physical devices to be combined into a single logical device?

- A. device visualization
- B. device clustering
- C. server visualization
- D. network visualization

**Answer: B**

**QUESTION: 11**

Which two of these are characteristics of MPLS VPNs? (Choose two)

- A. Layer 3 MPLS VPNs can forward only IP packets
- B. Layer 2 MPLS VPNs can forward any network protocol
- C. MPLS label paths are automatically formed based on Layer 2 frames
- D. Layer 3 MPLS VPNs can forward any network protocol based on Layer 2 frames
- E. In Layer 2 MPLS VPNs, the service provider controls the customer Layer 3 policies

**Answer: A, B**

**QUESTION: 12**

Which technology is an example of the need for a designer to clearly define features and designed performance when designing advanced WAN services with a service provider?

- A. FHRP to remote branches.
- B. Layer 3 MPLS VPNs routing.
- C. Control protocols (for example Spanning Tree Protocol) for a Layer 3 MPLS service.
- D. Intrusion prevention, QoS, and stateful firewall support network wide.

**Answer: B**

**QUESTION: 13**

Which two restrictions must the Enterprise Campus network designer consider when evaluating WAN connectivity options? (Choose two)

## Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
- **Lifetime** login access.
- Unlimited download, no account expiry, no hidden charges, just one time \$99 payment.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with explanations (If applicable).
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
